

COMPANY PROFILE 2026

Empowering Governance & Business Through Technology

WEBSOL TECHNOLOGIES

Founder's Message

When I started **Websol Technologies** in 2017, it wasn't just a business idea, it was the continuation of a journey that began years earlier as a small web and hosting venture fueled by curiosity and ambition. What began as a single-person pursuit has grown into a company recognized for its reliability, innovation, and integrity.

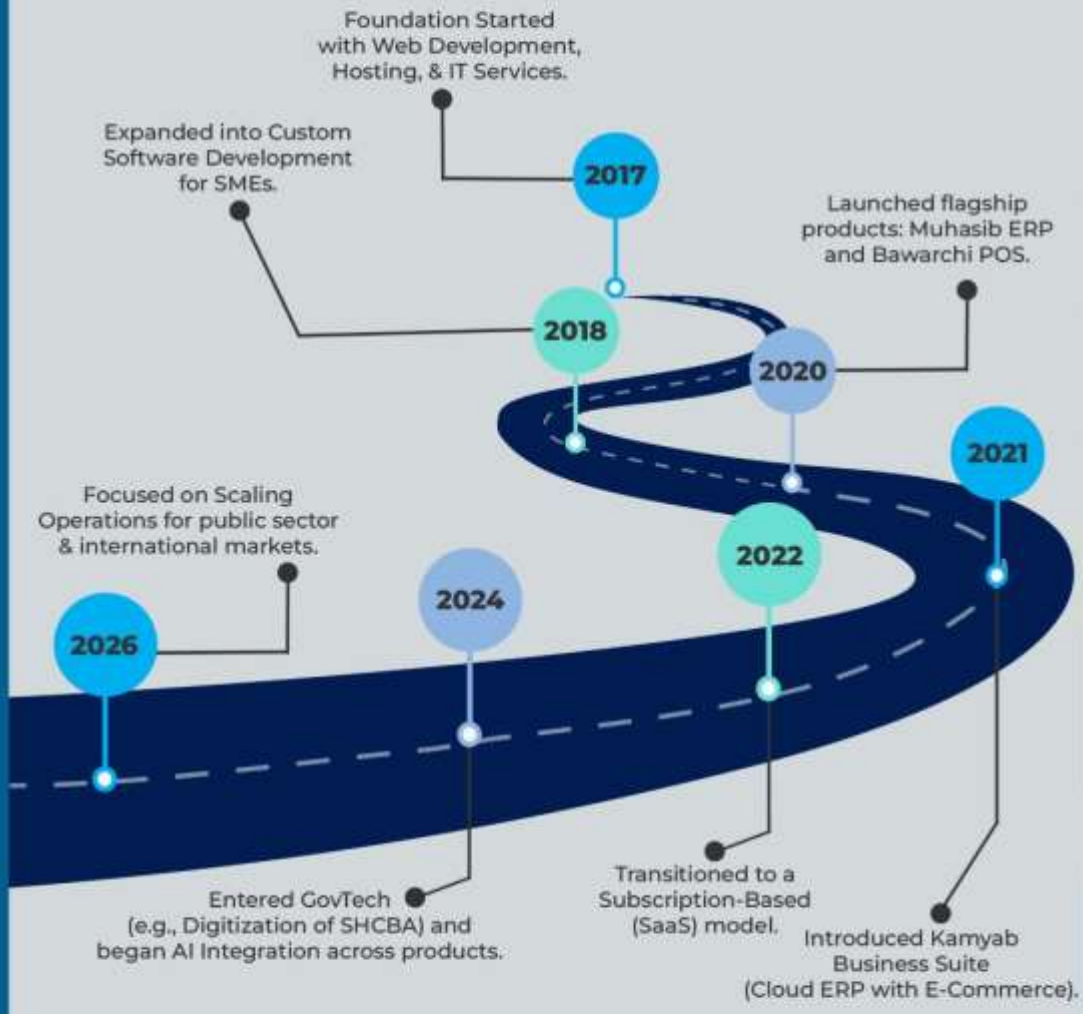

Today, Websol Technologies stands as a trusted partner in GovTech, enterprise solutions, and digital transformation, proudly serving government departments, educational institutions, corporates, and SMEs across Pakistan and beyond.

From secure e-voting systems for local bodies, to digital learning platforms for schools, and enterprise-grade ERP, CRM, and POS systems that drive modern businesses, every project we deliver carries one purpose: to make technology meaningful, accessible, and transformative.

Our mission is simple but powerful, to empower governance, education, healthcare, and business through intelligent, affordable, and scalable technology.
Our vision is bold, to see Pakistan emerge as a global leader in technology, particularly in ERP, GovTech, EdTech, and HealthTech innovation.

At Websol, we're not just building software; we're building systems of trust, solutions that shape institutions, strengthen transparency, and prepare the nation for a digital future.

Shah Rukh Saeed
Founder & CEO, Websol Technologies

Who We Are

Websol Technologies is a leading tech company redefining how organizations operate in the digital age. Since our inception, we've been on a mission to empower the public and private sectors, educational institutions, corporates, and SMEs through reliable, secure, and forward-thinking IT solutions.

From ERP and business management systems to hospital, school, and office automation, we design and build technology that simplifies operations, enhances transparency, and drives measurable growth. Our expertise spans HMS, SIMS, EDMS, E-Office, HRMS, CRM, and custom software development each solution tailored to meet the real-world challenges of our clients.

Our Numbers at a Glance

350 + satisfied clients across Pakistan

100 + international clients in diverse industries

10,000 + active users worldwide

Our Mission

To deliver affordable, scalable, and innovative technology solutions that create lasting impact for organizations and communities alike

Our Vision 2030

To establish Websol Technologies as a global leader in ERP, GovTech, EdTech, and HealthTech SaaS platforms advancing Pakistan's role in the global digital economy.

Core Services & Solutions

GovTech:
EDMS, E-Office, Intelligent Facilitation (multi-channel), E-Voting, Enrollment Digitization

Education Technology:
School Information Management System, Learning Management System, Digital Assessments

Enterprise Systems:
Muhasib ERP, ERP Simplify, Bawarchi POS

Business Solutions:
HRMS, CRM, Surveyor App, Industrial Automation

Web & App Engineering:
Web Development, App Development (Software / Mobile App)

Commerce & Growth:
E-Commerce Development, Digital Marketing, Social Media Management

Sindh High Court Bar Association:

The Sindh High Court Bar Association (SHCBA) partnered with Websol Technologies to lead its first-ever digital transformation initiative, introducing the SHCBA Digital Portal and Lawyers Portal.

The system now enables advocate registration, verification, and member access online, streamlining operations and improving communication within the legal community.

This milestone reflects Websol's commitment to empowering institutions through innovation and technology.

Mr. Shah Rukh Saeed, Founder & CEO of Websol Technologies, was honored by the Hon'ble Chief Justice of Sindh High Court, Justice Muhammad Shafi Siddiqui, for successfully launching the portals, marking a proud achievement in Pakistan's legal tech landscape.

Education Technology

- **SIMS (School Information Management System) –** Centralized academics, fees, attendance, results.
- **LMS (Learning Management System)** Digital classrooms, resources, assignments.
- **Digital Assessments –** Secure online exams for schools & institutes.

Army Public Schools & Colleges System (APSACS):

Websol Technologies partnered with APSACS South to lead a major digital transformation across multiple campuses modernizing academic and administrative systems through technology.

The initiative introduced a unified School Information Management System (SIMS), Electronic Document Management System (EDMS), and E-Office platform, enabling paperless communication, digital recordkeeping, and centralized campus management.

A dynamic, interactive web portal now connects students, parents, and faculty with real-time academic information reflecting APSACS South's commitment to innovation and Websol's vision for smarter, tech-driven education.

Enterprise Systems

Muhasib ERP
Sales, Procurements, Manufacturing, Accounting, HR, payroll, inventory, BI.

Case Study: Purrfect Pet Shop

Overview

Purrfect Pet Shop, a leading multi-branch pet retail chain in Pakistan, partnered with Websol Technologies to enhance its digital presence and streamline business operations. The goal was to connect their retail outlets with a robust e-commerce platform powered by *Muhasib ERP* for unified control.

Challenges

* Manual stock and sales tracking across multiple branches
* No centralized data or real-time updates
* Limited online visibility and customer engagement

Our Solution

Websol Technologies delivered a complete digital transformation by:

* Designing a responsive, SEO-optimized e-commerce website
* Implementing Muhasib ERP for multi-branch inventory and accounting management
* Integrating ERP with the online store for real-time synchronization of sales, stock, and financial data

Results

* 35% increase in total sales within 3 months
* Centralized operations across all branches
* Accurate inventory control and automated reporting
* Enhanced customer satisfaction and online growth

Client Feedback

"Websol Technologies transformed the way we manage our business. With Muhasib ERP and our new e-commerce site, everything runs smoothly across all locations."
